

ANTI-AGEING

**“GROWING OLD
IS INEVITABLE.
LOOKING OLD
IS AN OPTION!”**

With advancements in Aesthetics and Skincare over the last few decades, it is now possible to slow down and even reverse signs of ageing.

There are broadly two categories for Anti-Ageing in-clinic treatments or a combination of both:

- *Patented International Technologies (non-invasive)*
- *Injectables or what we like to call Non Surgical Face Contouring*

There is no single magic treatment or cream, unfortunately - that is why it is so important to trust an expert and to make a plan combining the best in-clinic treatments and homecare to suit your individual needs. With the right anti-ageing plan, it is possible to have real dramatic results which look natural and radiant.

» ANTI-AGING TECHNOLOGIES

Due to the advancement in science and technology its now possible to reverse years with technology that is non-surgical & non-invasive. What treatment you opt for would depend on what your skin-age is (yes, that's a thing, your skin age may not be the same as your actual age, it could be younger or older) and what results you're hoping to achieve.

A good point to remember while opting for these treatments would be that anti-aging is a science, not magic. You will look better and younger but you can't have unrealistic expectations, also the sooner you start, the better will be the results.

» SUPER MEDI-FACIALS

For those who want to combine a relaxing facial with anti-aging technology for active skin tightening, slowing down micro-aging

or just need maintenance and upkeep for their skin, Super-Medi Facials are the ultimate treatment. These facials combine internationally favoured anti-aging technologies like Ultrasound, Radio Frequency, Micro-current, LED Skin technology, pico-second lasers and so much more to give your skin the pick-me-up it needs to maintain your skin health. These are also married with various other technologies like lasers, mesotherapy, etc.

» **ULTRASOUND**

Ultrasound stimulates the production of new collagen and elastin deep within the skin. It uses the body's own regenerative response to gently and gradually lift skin. Focused ultrasound waves heat deep layers of skin tissue, to stimulate collagen production while bypassing the skin's surface. Ultrasound works from the inside-out to lift and tighten the skin non-invasively.

Ultherapy®

This is an ultrasound procedure that stimulates the production of new collagen and elastin deep within the skin. A single, 1.5 hour treatment gives results that last up to 1.5 years. It is the only non-invasive procedure US FDA-approved to lift the Neck, Chin & Brow, and also to improve the appearance of lines and wrinkles on the décolletage. We are also proud to be awarded the #1 Ultherapy Provider in India for 3 consecutive years!

Hi-Fu

This high frequency ultrasound-based device tightens the facial tissues through thermal energy. The thermal energy heats up the tissues beneath the skin, which stimulates collagen production and subsequent tightening for a tighter younger looking you.

Alma Prime™

This US FDA Approved device is the marriage of Ultrasound and Radio Frequency, it works on a mesh of collagen fibres, mobilizing them into action so that skin regains its elasticity and form. Now get a younger and more well defined appearance with this super device.

» **RADIO FREQUENCY**

As we age, the collagen in our skin weakens and starts to break down, causing skin to become laxer. When this happens the best thing you can do is find a solution that will help re-generate collagen and boost its building process. Radiofrequency™ energy, uses the tissue's resistance within the various layers of the skin to transform the RF energy given to the skin into thermal energy to boost the collagen building process and help tighten loose skin.

Our various RF devices available are:

Thermage® FLX

Better than the BEST

For the 1st time in India

New & improved

THERMAGE FLX™

More comfortable, precise & quicker

#1 Provider of Skin Tightening Treatments

We're proud to be the 1st clinic in India to offer the latest, most advanced and powerful version of Thermage® - Thermage® FLX. It is a US FDA approved, proven and unique radiofrequency treatment that can help improve the appearance of sagging or loose skin, giving you a tighter, sleeker and younger appearance. Thermage® has more than 2 million users worldwide and is known as the "celebrity treatment". Thermage® FLX offers a more effective, quicker and advanced treatment for face, eyes and body than the older generations of Thermage® technology and can be used for tightening skin on the face, neck and even eyelids!

Alma Prime™ and Venus® Technologies

We have a wide range of Alma Prime™ and Venus® technologies – Venus Freeze™, Venus Legacy™ and Venus Viva™. These use different types of radio frequency to give you the results you want. The concerns they target range from

- Skin Tightening for the Face, Neck & Body
- Body Contouring
- Cellulite Reduction
- Stretch Mark Improvement & so much more

AGELESS FACE IRONING TREATMENT™

This innovative non surgical treatment is just as unique as its name! The treatment uses InMode's Forma® - or as Hollywood popularly calls it, the 'Instant FaceLift' - will help you age gracefully without worrying about sagging skin or fine lines.

Highlights:

- Patented international technology
- Virtually painless
- Non-surgical facelift
- Skin tightening
- Skin remodeling
- Face contouring for a slimmer, more chiseled face
- Boosts collagen production, resulting in youthful, glowing skin

» **MESOTHERAPY**

The mesotherapy technique is used to infuse lightening agents like Idebenone, vit. C, Hyaluronic acid and skin boosters directly into the skin layers. In order to obtain effective results, we work on 2 levels. On a superficial layer to improve skin tone and texture and on a deeper level to boost collagen and improve skin elasticity and reduce skin laxity Treatment made easier, quicker, more comfortable & more effective with options like :

- *Channelising*
- *Mesojet technology*
- *Dermaroller*
- *AgeLess skINfusion Treatment™*

» **MORPHEUS8®**

Morpheus8® is a very safe and effective, minimally invasive modular RF fractional solution for full face, eyes and full body tightening. It delivers RF energy to the deepest layers of the skin to help

- Stimulate collagen
- Remodel the face and body
- Reveal fresh and youthful radiance
- Improve skin texture
- Reduces wrinkle
- Make skin firm
- Reduce signs of ageing like fine lines and wrinkles

» **LASER TIGHTENING - PICOSURE®**

PicoSure® is the world's first Picosecond laser made by the inventors of the original Q:Switched laser. US FDA approved PicoSure® is the most advanced American technology that works on 1/trillionth of a second and gives results for Skin Clarity and Rejuvenation like never before. It not only helps skin tone by reducing pigmentation but also helps tighten skin for a fresher and rejuvenated appearance.

The pulse of this amazing laser penetrates into the deeper layers of your skin and help boost collagen and elastin, which is the good stuff in your skin, that maintains your skin volume and elasticity. PicoSure® can help with fine lines, early wrinkles, improved skin texture, age spots and so much more.

» **AGELESS PRF FACE TREATMENT™**

The next generation of PRP & Vampire Facial is here! Instead of conventional PRP, we offer advanced treatments that are rich in fibrin and platelets but with a twist!

The biggest reason why our treatments are more effective than PRP is that they release more growth factors overtime which means that they continue working for you even after the procedure is done + its much less painful.

- *Look younger & rejuvenated*
- *Increase Collagen Production*
- *Lightening of Scars*
- *Reduce wrinkles*
- *Reduce Pigmentation*
- *Tighten skin & pores*

Why pick PRF treatments over PRP

- *More natural, no additive anti-coagulants*
- *Dramatically less painful*
- *Superior Results*

» **AGELESS LIQUID FACE LIFT™ OR NON SURGICAL FACE CONTOURING**

Of late it has become common to see overfilled cheeks, individuals who cannot smile and lack of facial expressions! This is the result of an overzealous hand. There is a fine line between treatments that look natural and those that look over-done. Injectables not only require excellent medical knowledge but also an artistic hand to give effective, yet natural looking results. At **The AgeLess Clinic** all injectable treatments like Fillers, Botox® and Thread Lifts are done by our Medical Head, **Dr. Harshna Bijlani** - she is trusted by many of Bollywood's best, has been awarded "*Best Skin Expert*" by Vogue Magazine & is regularly interviewed in leading magazines, newspapers & TV channels.

» **BOTOX®**

Botox® is one of the most popular as well as misconstrued anti-aging treatments. Botox® like all injectibles needs to be administered by a well-trained and skilled Doctor to see good results. You can look younger with Botox®, without looking "fake" as most people like to call it – if it's done well. Another misconception that people have with Botox® is that you need it only once you enter your 40's, this is NOT true. Botox® is a muscle relaxant which relaxes your facial muscles and prevents further wrinkles, it does not fill pre-existing deep wrinkles or make them disappear. The perfect time to opt for Botox® would be in your late 20's or at the initial stage of appearance of fine lines to prevent further wrinkling.

» **DERMAL FILLERS**

As we age, we lose fat and collagen just below the skin's surface. This causes our skin to sag, formation of hollows, sunken cheeks and under eye-hollows. Dermal fillers to the rescue! Dermal fillers are injected into the layers of the skin to help lift and fill in facial lines and creases, restoring a youthful, plumped-up appearance. Fillers can also be used for more than just wrinkles such as filling under eye hollows, plumping lips, creating a pointier nose, slimmer jaw, hand rejuvenation,

and even creating a pointier chin!
The results are immediate and astonishing and can take several years off you in a single session.

» **THREAD LIFT**

A thread lift is a type of procedure wherein temporary threads are used to produce a subtle but visible “lift” in the skin. In addition to being ideal for lifting the skin, threads also help boost your skin’s collagen to help it look younger and even help your face look visibly more contoured.

Our Medical Head, Dr Harshna Bijlani, is one of the pioneers in Fine Thread Contouring in India. Dr Harshna, has trained under some of the finest Doctors in the UK and Korea to master the ultimate V-Shape thread lift. We offer various types of threads such as APTOS, PDO’s, cogs, Definissee threads, etc. to suit your individual needs.

» **COLLAGEN MOISTURISERS**

We all use a moisturiser on the surface of our skin but what about the moisturising it needs from within? Enter Volite® and Prohilo®. These amazing collagen moisturisers help deliver collagen under the skin’s surface and give you fresher, younger looking glowing skin that lasts for 6-8 months after 1 single treatment.

- *Improves skin elasticity*
- *Improves skin laxity*
- *Boosts Collagen*
- *Gives a fresh & plump look to your skin*
